

The following instructions will help you achieve the best results from your **Sciton Moxi** treatment. If you have a history of cold sores, we recommend taking an anti-viral medication starting 1 day prior to your treatment. Please take a moment to review this information prior to your treatment.

**The day of your treatment please:**

- Arrive at the clinic with no make-up.
- Take 1000mg of Tylenol 1 hour prior to your appointment.
- If you are having your chest treated, please wear a strapless top.
- If you are having your bottom treated, please wear thong panties.

**2 Weeks before receiving treatment, please avoid the following:**

- Sun exposure and sunless tanning products.
- Fillers

**2 months before receiving treatment, please avoid the following:**

- Sun exposure and sunless tanning products as it may cause permanent irregular pigmentation in the treated areas.

**6-12 months before receiving treatment, please avoid the following:**

- Accutane

**Immediately after receiving I treatment:**

- Your skin may look red and feel tingly like a sunburn for up to 24 hours.
- Avoid make-up for the first 24 hours.

**24 hours after receiving treatment please:**

- You may return to your usual skin care program.
- You may wear make-up.
- Avoid using Retinol products.
- Wear sunscreen SPF 30 or higher.

**2-5 days after receiving treatment:**

- Your skin will darken, feel rough and you may see small dots. This will fall off and the renewed skin beneath will be soft.
